Publisher: Bearport Publishing
Publication Year: 2015
ISBN: 9781627243384
Number of Pages: 32
Interest Level: Preschool, Primary
Rating: Excellent

Review

There are patterns everywhere. All we need to do is look for them. This book introduces young children to patterns by pointing them out in the jungle. The scales on an iguana and the feathers on a peacock have patterns. Snakes, millipedes, tigers and even vines are great examples of patterns. What patterns do you see around you?

Patterns in the Jungle is a wonderful book for young readers to learn more about patterns. Every page has a beautiful photograph of scenes from the jungle. Children who are fascinated by animals will enjoy looking at the many different creatures pictured. The photos are vibrant and some are even silly. It is a great book for a classroom setting or a school library.
