Recommended Citation

(2009) "End Matter, Vol. 69 No. 1," *Western North American Naturalist*: Vol. 69 : No. 1 , Article 24.
Available at: <https://scholarsarchive.byu.edu/wnan/vol69/iss1/24>

This End Matter is brought to you for free and open access by the Western North American Naturalist Publications at BYU ScholarsArchive. It has been accepted for inclusion in Western North American Naturalist by an authorized editor of BYU ScholarsArchive. For more information, please contact scholarsarchive@byu.edu, ellen_amatangelo@byu.edu.

CONTENTS

(Continued from back cover)

Home-range size and overlap of sympatric male mule and white-tailed deer in Texas	
. Kristina J. Brunjes, Warren B. Ballard, Mary H. Humphrey, Fielding Harwell, Nancy E. McIntyre, Paul R. Krausman, and Mark C. Wallace	125
Scorpions are a food item of American black bears in Sonora, Mexico	
. Carlos A. López-González, Robert W. Jones, Carmen Silva-Hurtado, and Ivan A. Sáyago-Vázquez	131
Bats associated with inactive mines in the western Great Basin	
. Michael L. Morrison and Sue Fox	134
Occurrence of the centipede <i>Ectonocryptoides quadrimeropus</i> Shelley and Mercurio, 2005, in Central Mexico (Scolopendromorpha: Scolopocryptopidae: Ectonocryptopinae)	
. Rowland M. Shelley	138
New distribution record for the social parasitic ant <i>Anergates atratulus</i> (Schenck, 1852) (Hymenoptera: Formicidae): an IUCN red-listed species.	
. Shawn T. Dash and Leticia Sanchez	140
Book Reviews	
Condors in Canyon Country: The Return of the California Condor to the Grand Canyon Region by Sophie A. H. Osborn	142
The Gentle Subversive: Rachel Carson and the Rise of the Environmental Movement by Mark H. Lytle	144
Reviewers for 2008	147

INFORMATION FOR AUTHORS

The *Western North American Naturalist* welcomes previously unpublished manuscripts pertaining to the biological natural history of western North America, including western Canada and all of Mexico. Preference will be given to concise manuscripts of up to 12,000 words. Simple species lists are discouraged.

SUBMIT MANUSCRIPTS online at <https://ojs.lib.byu.edu/ojs/index.php/wnan/information/authors> or send an electronic copy to Mark C. Belk, Editor, *Western North American Naturalist*, wnan@byu.edu, or via mail to 190 MLBM, Brigham Young University, Provo, UT 84602-0200. An accompanying cover letter must provide information describing the extent to which data, text, or illustrations have been used in other papers or books that are published, in press, submitted, or soon to be submitted elsewhere. Authors should adhere to the following guidelines; manuscripts not so prepared may be returned for revision.

MANUSCRIPT PREPARATION. In general, the *Western North American Naturalist* follows recommendations in *Scientific Style and Format: The CSE Manual for Authors, Editors, and Publishers*, 7th edition (Rockefeller University Press, New York; available from: www.councilscienceeditors.org). However, we do differ in our treatment of entries in literature cited and other minor stylistic matters. Authors should consult the most recent issue of the *Western North American Naturalist* for formatting guidelines.

TYPE AND DOUBLE SPACE all materials, including literature cited, tables, and figure legends. Use the word processor's font attributes to indicate italics, superscripts, subscripts, and so forth. Use standard page format (22×28 cm), leaving 2.5-cm margins on all sides.

SUBMIT A PDF or word processor document. If submitting by postal mail, send 1 copy of the manuscript with laser-printed or photocopied figures. Number all pages and assemble the document in the following order: title page, abstract and key words, text, acknowledgments, literature cited, appendixes, tables, figure legends, figures.

TITLE PAGE includes an informative title no longer than 15 words; names, addresses, and e-mail addresses of all authors; a running head of fewer than 40 letters and spaces; and footnotes to indicate change of address and author to whom correspondence should be addressed if other than the 1st author.

ABSTRACT states the purpose, methods, results, and conclusions of the research. It is followed by 6–12 key words, listed in order of decreasing importance, to be used for indexing.

TEXT has centered main headings printed in all capital letters; 2nd-level headings are centered in upper- and lowercase letters; 3rd-level headings begin paragraphs.

VOUCHER SPECIMENS. Authors are encouraged to designate, properly prepare, label, and deposit

high-quality voucher specimens and cultures documenting their research in an established permanent collection, and to cite the repository in publication.

REFERENCES IN THE TEXT are cited by author and date: e.g., Martin (1998) or (Martin 1998). Multiple citations should be separated by commas and listed in chronological order. Use “et al.” after name of 1st author for citations having more than 2 authors.

ACKNOWLEDGMENTS, under a centered main heading, include special publication numbers when appropriate.

LITERATURE CITED, also under a centered main heading, lists references alphabetically in the following formats:

- KONDOLE, G.M. 1997. Hungry water: effects of dams and gravel mining on river channels. *Environmental Management* 21:533–551.
- BRADY, N.C. 1990. The nature and properties of soils. 10th edition. Macmillan, New York.
- TOKESHI, M. 1995. Life cycles and population dynamics. Pages 225–268 in P. Armitage, P.S. Cranston, and L.C.V. Pinder, editors, *The Chironomidae: biology and ecology of non-biting midges*. Chapman and Hall, London.

TABLES are double spaced on separate sheets and designed to fit the width of either a single column (6.7 cm) or a page (14.0 cm). Use lowercase letters to indicate footnotes whenever possible.

FIGURES are submitted initially with the manuscript; editors may suggest changes. Lettering on figures should be large enough to withstand reduction to 1- or 2-column width. Originals must be no larger than 22×28 cm. Acceptable file formats are EPS, TIF, JPEG, or PDF. Resolution should be 300 dpi for photographs and up to 1200 dpi for black-and-white line art.

NOTES. If the manuscript would be more appropriate as a short communication or note, follow the above instructions but do not include section headings.

A CHARGE of \$55 per page is made for articles published; the rate for individual subscribers will be \$40 per page. However, manuscripts with color figures, complex tables, or numerous photographs may be assessed an additional charge. A PDF file of the published article will be provided to the corresponding author.

FINAL CHECK:

- Cover letter explaining any duplication of information
- Inclusion of addresses and e-mail addresses of all authors on the manuscript's title page
- A word processor file (electronic submission), or 1 hard copy of the manuscript (mail submission)
- Conformity with instructions
- Electronic figure files in EPS, TIF, JPEG, or PDF format; or photocopies of illustrations.

CONTENTS

Articles

- Regional and seasonal diet of the Western Burrowing Owl in south central Nevada
. Derek B. Hall, Paul D. Greger, and Jeffrey R. Rosier **1**
- Herbaceous succession after burning of cut western juniper trees
. Jon D. Bates and Tony J. Svejcar **9**
- Multiple-scale roost habitat comparisons of female Merriam's Wild Turkeys in the southern
Black Hills, South Dakota Daniel J. Thompson, Mark A. Rumble, Lester D. Flake,
and Chad P. Lehman **26**
- Age and growth of bluehead suckers and flannelmouth suckers in headwater tributaries,
Wyoming. Diana E. Sweet, Robert I. Compton, and Wayne A. Hubert **35**
- Comparative susceptibility of conifers to knobcone pine dwarf mistletoe
. Robert L. Mathiasen **42**
- Rediscovered population of Mexican Plateau spotted whiptail lizard, *Aspidoscelis septemvittata*
(Teiidae), from México, D.F. Oswaldo Hernández-Gallegos,
Felipe de Jesús Rodríguez-Romero, Petra Sánchez-Nava, and Fausto R. Méndez **49**
- Effects of elevation and genetic introgression on growth of Colorado River cutthroat trout
. Mark C. Belk, Michael N. McGee, and Dennis K. Shiozawa **56**
- Assessing cheatgrass (*Bromus tectorum*) genetic diversity and population structure using
RAPD and microsatellite molecular markers Michael C. Ashley
and William S. Longland **63**
- Dynamic responses of a British Columbian forest-grassland interface to prescribed burning
. Kim Ducherer, Yuguang Bai, Don Thompson, and Klaas Broersma **75**
- Relationship between cheatgrass coverage and the relative abundance of snakes on Antelope
Island, Utah. Lucas K. Hall, John F. Mull, and John F. Cavitt **88**
- Sperm viability in the reproductive tract of females in a population of *Sceloporus mucronatus*
exhibiting asynchronous reproduction. Angela M. Ortega-León,
Maricela Villagrán-Santa Cruz, J. Jaime Zúñiga-Vega, Raúl Cueva-del Castillo,
and Fausto R. Méndez-de la Cruz **96**
- Grass rhizosheaths: associated bacterial communities and potential for nitrogen fixation
. David Bergmann, Mike Zehfus, Linda Zierer, Brian Smith, and Mark Gabel **105**
- ### Notes
- Maternal defensive behavior of mountain goats against predation by Golden Eagles
. Sandra Hamel and Steeve D. Côté **115**
- Distribution and first reports of Branchiobdellida (Annelida: Clitellata) on crayfish in the
prairie provinces of Canada Bronwyn W. Williams, Stuart R. Gelder,
and Heather Proctor **119**
