(Continued from back cover)

A distinctive new taxon: *Gilia karenae* (Polemonaceae) Stanley L. Welsh
and Ronald Kass **138**

Book Review

The Jepson Manual: Vascular Plants of California *edited by B.G. Baldwin, D.H. Goldman,
D.J. Keil, R. Patterson, T.J. Rosatti, and D.H. Wilken* Christopher M. Moore **141**

The Warbler Guide *by Tom Stephenson and Scott Whittle* Howard O. Clark Jr. **143**

INFORMATION FOR AUTHORS

The *Western North American Naturalist* welcomes previously unpublished manuscripts pertaining to the biological natural history of western North America, including western Canada and all of Mexico. Preference will be given to concise manuscripts of up to 12,000 words. Longer manuscripts will be considered for the monograph series. Simple species lists are discouraged.

SUBMIT MANUSCRIPTS through the web interface at <http://www.editorialmanager.com/wnan> or send an electronic copy to Mark C. Belk, Editor, *Western North American Naturalist*, wnan@byu.edu. During submission, authors will be expected to provide information describing the extent to which data, text, or illustrations have been used in other papers or books that are published, in press, submitted, or soon to be submitted elsewhere. Authors should adhere to the following formatting guidelines; manuscripts not so prepared may be returned for revision.

MANUSCRIPT PREPARATION. In general, the *Western North American Naturalist* follows recommendations in *Scientific Style and Format: The CSE Manual for Authors, Editors, and Publishers*, 8th edition (University of Chicago Press; available from: <http://www.councilscienceeditors.org>). However, we do differ in our treatment of entries in literature cited and other minor stylistic matters. Authors should consult the most recent issue of the *Western North American Naturalist* for formatting examples.

TYPE AND DOUBLE SPACE all materials, including literature cited, tables, and figure captions. Use the word processor's font attributes to indicate italics, superscripts, subscripts, and so forth. Use a standard page size and margin allowance.

SUBMIT ELECTRONIC FILES. Please follow the online instructions for file submission. A PDF file will be compiled automatically and made available for your approval before the submission is finalized.

TITLE PAGE includes an informative title no longer than 20 words; names, affiliations, and e-mail addresses of all authors; a running head of fewer than 40 letters and spaces; and notes to indicate changes of address and the author to whom correspondence should be sent.

ABSTRACT states briefly the purpose, methods, results, and conclusions of the research. Authors are welcome to provide a Spanish translation of their abstract for a reduction of total page charges by \$40 for notes and \$65 for articles.

TEXT has centered main headings printed in all capital letters; 2nd-level headings are centered in upper- and lowercase letters; 3rd-level headings begin paragraphs.

VOUCHER SPECIMENS. Authors are encouraged to designate, properly prepare, label, and deposit high-quality voucher specimens and cultures documenting

their research in an established permanent collection, and to cite the repository in publication.

REFERENCES IN THE TEXT are cited by author and date: e.g., Martin (1998) or (Martin 1998). Multiple citations should be separated by commas and listed in chronological order. Use "et al." after name of first author for citations having more than 2 authors.

ACKNOWLEDGMENTS, under a centered main heading, include special publication numbers, grant or contract numbers, or protocol numbers when appropriate.

LITERATURE CITED, also under a centered main heading, lists references alphabetically in the following formats (journal article, book, edited work):

- KONDOLE, G.M. 1997. Hungry water: effects of dams and gravel mining on river channels. *Environmental Management* 21:533–551.
- BRADY, N.C. 1990. The nature and properties of soils. 10th edition. Macmillan, New York, NY.
- TOKESHI, M. 1995. Life cycles and population dynamics. Pages 225–268 in P. Armitage, P.S. Cranston, and L.C.V. Pinder, editors, *The Chironomidae: biology and ecology of non-biting midges*. Chapman and Hall, London, England.

TABLES are prepared as separate word processing files. Authors should consider that tables will be typeset to fit the width of either a single column (6.7 cm) or a page (14.0 cm) in the journal. Wider tables will be rotated 90° and can have a maximum width of 21 cm. Typically, lowercase letters are used to indicate footnotes.

FIGURES are prepared as separate files in the following acceptable formats: EPS, TIF, JPEG, or PDF. Lettering on figures should be large enough to withstand reduction to 1- or 2-column width. Resolution should be 300 dpi for photographs and up to 1200 dpi for black-and-white line art.

NOTES. If the manuscript would be more appropriate as a short communication or note, follow the above instructions but do not include section headings.

PAGE CHARGES. \$55 per printed page is assessed for articles and notes published; the rate if any one of the authors is an individual subscriber will be \$40 per page. Manuscripts with color figures will be assessed an additional flat charge of \$300. A PDF file of the published article will be provided to all authors.

FINAL CHECK:

- Inclusion of affiliations and e-mail addresses of all authors on the manuscript's title page
- A word processor file containing the text, literature cited, and figure captions.
- Tables in word processor files
- Figures in EPS, TIF, JPG, or PDF format
- Conformity with instructions

Western North American Naturalist
