## Notes

First contemporary record of jaguar in Morelos State and the Sierra de Huautla Biosphere Reserve, Mexico . . . . .	David Valenzuela-Galván, Floriely Castro-Campos, Jorge Servin, Manlio Martínez-Barona, and Juan Carlos Martíniz-Montes	<b>370</b>
Reproductive notes on shrews (Family Soricidae) in Louisiana . . . . .	Leann Lucas and Justin D. Hoffman	<b>374</b>
Notes on the ecology of <i>Reithrodontomys microdon</i> based on new records in the Eje Neovolcánico, México . . . . .	Francisco X. González-Cózatl and Elizabeth Arellano	<b>377</b>
Microhabitat and house use by dusky-footed woodrats ( <i>Neotoma fuscipes</i> ) in northwestern California: insight from trapping data . . . . .	Ted J. Slowik	<b>380</b>
<b>Announcements</b>		
Outstanding natural history paper of 2014 . . . . .		<b>385</b>

## INFORMATION FOR AUTHORS

The *Western North American Naturalist* welcomes previously unpublished manuscripts pertaining to the biological natural history of western North America, including western Canada and all of Mexico. Preference will be given to concise manuscripts of up to 12,000 words. Longer manuscripts will be considered for the monograph series. Simple species lists are discouraged.

**SUBMIT MANUSCRIPTS** through the web interface at <http://www.editorialmanager.com/wnan> or send an electronic copy to Mark C. Belk, Editor, *Western North American Naturalist*, [wnan@byu.edu](mailto:wnan@byu.edu). During submission, authors will be expected to provide information describing the extent to which data, text, or illustrations have been used in other papers or books that are published, in press, submitted, or soon to be submitted elsewhere. Authors should adhere to the following formatting guidelines; manuscripts not so prepared may be returned for revision.

**MANUSCRIPT PREPARATION.** In general, the *Western North American Naturalist* follows recommendations in *Scientific Style and Format: The CSE Manual for Authors, Editors, and Publishers*, 8th edition (University of Chicago Press; available from: <http://www.councilscienceeditors.org>). However, we do differ in our treatment of entries in literature cited and other minor stylistic matters. Authors should consult the most recent issue of the *Western North American Naturalist* for formatting examples.

**TYPE AND DOUBLE SPACE** all materials, including literature cited, tables, and figure captions. Use the word processor's font attributes to indicate italics, superscripts, subscripts, and so forth. Use a standard page size and margin allowance.

**SUBMIT ELECTRONIC FILES.** Please follow the online instructions for file submission. A PDF file will be compiled automatically and made available for your approval before the submission is finalized.

**TITLE PAGE** includes an informative title no longer than 20 words; names, affiliations, and e-mail addresses of all authors; a running head of fewer than 40 letters and spaces; and notes to indicate changes of address and the author to whom correspondence should be sent.

**ABSTRACT** states briefly the purpose, methods, results, and conclusions of the research. Authors are welcome to provide a Spanish translation of their abstract for a reduction of total page charges by \$40 for notes and \$65 for articles.

**TEXT** has centered main headings printed in all capital letters; 2nd-level headings are centered in upper- and lowercase letters; 3rd-level headings begin paragraphs.

**VOUCHER SPECIMENS.** Authors are encouraged to designate, properly prepare, label, and deposit high-quality voucher specimens and cultures documenting

their research in an established permanent collection, and to cite the repository in publication.

**REFERENCES IN THE TEXT** are cited by author and date: e.g., Martin (1998) or (Martin 1998). Multiple citations should be separated by commas and listed in chronological order. Use "et al." after name of first author for citations having more than 2 authors.

**ACKNOWLEDGMENTS**, under a centered main heading, include special publication numbers, grant or contract numbers, or protocol numbers when appropriate.

**LITERATURE CITED**, also under a centered main heading, lists references alphabetically in the following formats (journal article, book, edited work):

KONDOLE, G.M. 1997. Hungry water: effects of dams and gravel mining on river channels. *Environmental Management* 21:533–551.

BRADY, N.C. 1990. The nature and properties of soils. 10th edition. Macmillan, New York, NY.

TOKESHI, M. 1995. Life cycles and population dynamics. Pages 225–268 in P. Armitage, P.S. Cranston, and L.C.V. Pinder, editors, *The Chironomidae: biology and ecology of non-biting midges*. Chapman and Hall, London, England.

**TABLES** are prepared as separate word processing files. Authors should consider that tables will be typeset to fit the width of either a single column (6.7 cm) or a page (14.0 cm) in the journal. Wider tables will be rotated 90° and can have a maximum width of 21 cm. Typically, lowercase letters are used to indicate footnotes.

**FIGURES** are prepared as separate files in the following acceptable formats: EPS, TIF, JPEG, or PDF. Lettering on figures should be large enough to withstand reduction to 1- or 2-column width. Resolution should be 300 dpi for photographs and up to 1200 dpi for black-and-white line art.

**NOTES.** If the manuscript would be more appropriate as a short communication or note, follow the above instructions but do not include section headings.

**PAGE CHARGES.** \$55 per printed page is assessed for articles and notes published; the rate if any one of the authors is an individual subscriber will be \$40 per page. A press-quality PDF file of the published article will be provided to the corresponding author for distribution.

### FINAL CHECK:

- Inclusion of affiliations and e-mail addresses of all authors on the manuscript's title page
- A word processor file containing the text, literature cited, and figure captions.
- Tables in word processor files
- Figures in EPS, TIF, JPG, or PDF format
- Conformity with instructions

## CONTENTS

### Articles

- Use of external characteristics for rapid identification of gender of pocket gophers . . . . .  
. . . . . Roger A. Baldwin and Ryan Meinerz **251**
- An irrigation canal as a lotic mesocosm: examining the relationship between macroinvertebrate  
benthos and drift . . . . . Peter Koetsier  
and Luana M. M. McCauley **259**
- Seasonal variation in reproductive condition of the Pecos Bluntnose Shiner (*Notropis sinus  
pecosensis*) . . . . . Thomas P. Archdeacon, Sara D. Blocker, Stephen R. Davenport,  
and Kjetil R. Henderson **271**
- Pine bark beetle and dwarf mistletoe infestation in a remnant old-growth stand . . . . .  
. . . . . Nicholas Aflitto, Tom DeGomez, Richard Hofstetter, John Anhold,  
Joel McMillin, Mike Wagner, and Eryn Schneider **281**
- Comparative nest-site habitat of Painted Redstarts and Red-faced Warblers in the Madrean  
Sky Islands of southeastern Arizona . . . . . Joseph L. Ganey, William M. Block,  
Jamie S. Sanderlin, and Jose M. Iniguez **291**
- Lichen inventory of White Rocks Open Space (City of Boulder, Colorado) . . . . .  
. . . . . Erin A. Tripp **301**
- Stream macroinvertebrates and habitat below and above two wilderness fords used by mules,  
horses, and hikers in Yosemite National Park . . . . . Jeffrey G. Holmquist,  
Jutta Schmidt-Gengenbach, and James W. Roche **311**
- Genetic evidence for recent spread of springsnails (Hydrobiidae: *Pyrgulopsis*) across the  
Wasatch divide . . . . . Hsiu-Ping Liu, Peter Hovingh, and Robert Hershler **325**
- Survival and plant vigor of *Sclerocactus parviflorus* (Clover and Jotter) following different  
transplanting techniques . . . . . Richard Ballard, Rick Ott, Tim Novotny,  
Anna Lincoln, and Eric Rechel **332**
- Food habits of coyotes, gray foxes, and bobcats in a coastal southern California urban landscape  
. . . . . Rachel N. Larson, Dana J. Morin, Izabela A. Wierzbowska,  
and Kevin R. Crooks **339**
- Microhabitat selection of brood-rearing sites by Greater Sage-Grouse in Carbon County, Wyoming  
. . . . . Leslie A. Schreiber, Christopher P. Hansen, Mark A. Rumble,  
Joshua J. Millspaugh, R. Scott Gamo, Jon W. Kehmeier, and Nate Wojcik **348**
- A note on the observable bark coloration of quaking aspen (*Populus tremuloides*) . . . . .  
. . . . . Oren Rabinowitz and Erin A. Tripp **364**
