This End Matter is brought to you for free and open access by the Western North American Naturalist Publications at BYU ScholarsArchive. It has been accepted for inclusion in Great Basin Naturalist by an authorized editor of BYU ScholarsArchive. For more information, please contact scholarsarchive@byu.edu, ellen_amatangelo@byu.edu.

The Shrub Research Consortium and
the Great Basin Environmental Education Center
are sponsoring the

10TH WILDLAND SHRUB SYMPOSIUM

August 12–14, 1998
Snow College, Ephraim, Utah

Shrubland Ecotones is the theme of the symposium, which will feature a mid-symposium field trip to the Great Basin Experimental Range and to hybrid zones in Salt Creek in the Uinta National Forest. Contributed papers and posters are invited and should address the following topics:

- succession within and between communities
- biodiversity
- hybrid zones
- edge effects
- the role of boundaries in biology, management, and restoration of various shrubland communities and their interfaces with other communities
- other subjects on shrubland biology

Proceedings of the symposium will be published by the USDA Forest Service and distributed to each registrant. Participants interested in making an oral or poster presentation should send the title and an abstract of 200 words or less before January 15, 1998, to Durant McArthur at the address below. Pre-registration materials and information concerning lodging can be obtained from Dave Lanier:

INFORMATION FOR AUTHORS

The *Great Basin Naturalist* welcomes previously unpublished manuscripts pertaining to the biological natural history of western North America. Preference will be given to concise manuscripts of up to 12,000 words. Simple species lists are discouraged.

SUBMIT MANUSCRIPTS to Richard W. Baumann, Editor, *Great Basin Naturalist*, 290 MLBM, PO Box 20200, Brigham Young University, Provo, UT 84602-0200. An accompanying cover letter must include phone number(s) of the author submitting the manuscript, and FAX number and E-mail address when applicable; the letter must also provide information describing the extent to which data, text, or illustrations have been used in other papers or books that are published, in press, submitted, or soon to be submitted elsewhere. Authors should adhere to the following guidelines; manuscripts not so prepared may be returned for revision.

MANUSCRIPT PREPARATION. In general, the *Great Basin Naturalist* follows recommendations in *Scientific Style and Format: The CBE Manual for Authors, Editors, and Publishers*, 6th edition (Council of Biology Editors, Inc., 11 South LaSalle Street, Suite 1400, Chicago, IL 60603, USA; PHONE 312-201-0101; FAX 312-201-0214). We do, however, differ in our treatment of entries in Literature Cited. Authors may consult Vol. 51, No. 2 of this journal for specific instructions on format; these instructions, GUIDELINES FOR MANUSCRIPTS SUBMITTED TO THE GREAT BASIN NATURALIST, are printed at the back of the issue. Also, check the most recent issue of the *Great Basin Naturalist* for changes.

TYPE AND DOUBLE SPACE all materials, including literature cited, table headings, and figure legends. Avoid hyphenated words at the right-hand margins. Use WordPerfect's italics feature for words to be printed in italics. Use standard bond (22×28 cm), leaving 2.5-cm margins on all sides.

SUBMIT 3 COPIES of the manuscript (5 copies of fish manuscripts) and the original on a 3.5-inch disk utilizing WordPerfect 5.1 or above. Number all pages and assemble each copy separately: title page, abstract and key words, text, acknowledgments, literature cited, appendices, tables, figure legends, figures.

TITLE PAGE includes an informative title no longer than 15 words, names and addresses of authors, a running head of fewer than 40 letters and spaces, footnotes to indicate change of address and author to whom correspondence should be addressed if other than the first author.

ABSTRACT states the purpose, methods, results, and conclusions of the research. It is followed by 6–12 key words, listed in order of decreasing importance, to be used for indexing.

TEXT has centered main headings printed in all capital letters; second-level headings are centered in upper- and lowercase letters; third-level headings begin paragraphs.

VOUCHER SPECIMENS. Authors are encouraged to designate, properly prepare, label, and deposit high-quality voucher specimens and cultures documenting their research in an established permanent collection, and to cite the repository in publication.

REFERENCES IN THE TEXT are cited by author and date: e.g., Martin (1989) or (Martin 1989). Multiple citations should be separated by commas and listed in chronological order. Use "et al." after name of first author for citations having more than two authors.

ACKNOWLEDGMENTS, under a centered main heading, include special publication numbers when appropriate.

LITERATURE CITED, also under a centered main heading, lists references alphabetically in the following formats:

Mack, G.D., and L.D. Flake. 1980. Habitat relationships of waterfowl broods on South Dakota stock ponds. *Journal of Wildlife Management* 44:695–700.

Sousa, W.P. 1985. Disturbance and patch dynamics on rocky intertidal shores. Pages 101–124 in S.T.A. Pickett and P.S. White, editors, *The ecology of natural disturbance and patch dynamics*. Academic Press, New York.

Coulson, R.N., and J.A. Witter. 1984. *Forest entomology: ecology and management*. John Wiley and Sons, Inc., New York. 669 pp.

TABLES are double spaced on separate sheets and designed to fit the width of either a single column or a page. Use lowercase letters to indicate footnotes.

PHOTOCOPIES OF FIGURES are submitted initially with the manuscript; editors may suggest changes. Lettering on figures should be large enough to withstand reduction to one- or two-column width. Originals must be no larger than 22×28 cm.

NOTES. If the manuscript would be more appropriate as a short communication or note, follow the above instructions but do not include an abstract.

A CHARGE of \$50 per page is made for articles published; the rate for individual subscribers will be \$35 per page. However, manuscripts with complex tables and/or numerous photographs may be assessed an additional charge. Reprints may be purchased at the time of publication (an order form is sent with the proofs).

FINAL CHECK:

- Cover letter explaining any duplication of information and providing phone number(s), FAX number, and E-mail address
- 3 copies of the manuscript (5 copies of fish papers) and WordPerfect diskette
- Conformity with instructions
- Photocopies of illustrations

CONTENTS**Articles**

- Mayfly fauna of New Mexico W.P. McCafferty, C.R. Lugo-Ortiz,
and G.Z. Jacobi **283**
- Holocene vegetation and historic grazing impacts at Capitol Reef National Park
reconstructed using packrat middens Kenneth L. Cole,
Norman Henderson, and David S. Shafer **315**
- Mule deer and pronghorn use of wastewater ponds in a cold desert
. Karen L. Cieminski and Lester D. Flake **327**
- Observations on the reproduction, sources of mortality, and diet of the Kendall
Warm Springs dace Andrew D. Gryska and Wayne A. Hubert **338**
- Two new species of Chloroperlidae (Plecoptera) from California
. R.W. Baumann and R.L. Bottorff **343**
- Homing in eastern fence lizards (*Sceloporus undulatus*) following short-distance
translocation Eric W. Hein and Shayna J. Whitaker **348**
- New variety of *Astragalus conjunctus* S. Watson from Benton County, Washington
. Stanley L. Welsh, Florence Caplow, and Kathryn Beck **352**

Notes

- Coyote activity patterns in the Sierra Nevada John A. Shivik,
Michael M. Jaeger, and Reginald H. Barrett **355**
- U.S. distribution of the Coeur d'Alene salamander (*Plethodon idahoensis* Slater
and Slipp) Albert G. Wilson, Jr., Evelyn M. Wilson,
