Recommended Citation

(1970) "End Matter, Vol. 11 No. 1," *Brigham Young University Science Bulletin, Biological Series*: Vol. 11 : No. 1 , Article 3.
Available at: <https://scholarsarchive.byu.edu/byuscib/vol11/iss1/3>

This End Matter is brought to you for free and open access by the Western North American Naturalist Publications at BYU ScholarsArchive. It has been accepted for inclusion in Brigham Young University Science Bulletin, Biological Series by an authorized editor of BYU ScholarsArchive. For more information, please contact scholarsarchive@byu.edu, ellen_amatangelo@byu.edu.

INFORMATION FOR CONTRIBUTORS

Contributions to the *Science Bulletin* should be primarily monographic in nature. For the most part only manuscripts of approximately forty or more typewritten pages will be accepted.

Papers will be published approximately in the order that they are received, pending availability of funds. Authors must arrange for financing their publications, except that the University Press and the library of Brigham Young University will share the publication cost proportionately to their needs for copies of the article printed.

In the preparation of manuscripts, authors are requested to follow the Style Manual for Biological Journals, American Institute of Biological Sciences, 2000 P Street, N.W., Washington, D.C., 20006. Manuscripts must be typed on one side of the paper only, double-spaced with ample margins. Footnotes should be avoided.

To facilitate review by referees, send to the editor the original manuscript and one carbon copy, together with the illustrations. Copies of the original illustrations may be submitted, but should be of quality equal to the originals.

Illustrations should be referred to as figures except for materials requiring inserts of special paper, which may be called plates. Illustrations should be so designed as to fit when reduced into a one-column or full-page width. Special care must be taken to allow for proper reduction in lettering (i.e., a 50% reduction of the figure means also a 50% reduction in the lettering). Photographs should be of a glossy finish, unblurred, and showing sharp contrast. Line drawings should be made with black ink on heavy white drawing paper, blue tracing cloth, or blue-ruled coordinate paper. Use the same abbreviations on line drawings as in text. Line drawings must be equivalent to a professional draftsman's work. Original drawings

are preferable to photographs, even if they are large. Illustrations (line drawings or photographs) should be numbered consecutively throughout the paper, and the approximate place of insertion should be indicated in the margins of the manuscript pages. Captions for illustrations should be assembled on a separate sheet, and each plate of figures must have its corresponding figure number pencilled lightly on the back. Illustrations and cuts will be destroyed unless their return is requested when proof is returned to the editor.

A table title should be a short, concise statement of what the table purports to show, and should not include information necessary to the interpretation of the table. Every column in the table should carry a head identifying the data in that column; the measure in which the data are given should be indicated at the head of each column. Tables should not be used when the same information can be given in a few lines of text, and should not duplicate information in text, graphs, or charts. Symbols (asterisk, dagger, etc.) should be used to indicate footnotes to tables, with footnotes on the same page as the table.

An abstract of less than four percent of the length of the paper should be prepared. This summary should be understandable without reference to the body of the manuscript. The abstract must be on sheets separate from the manuscript.

Proof should be corrected immediately on receipt and returned to the editor. Authors should leave forwarding addresses if they move from the address sent with the manuscript.

Reprints should be ordered when the proof is returned.

Address all manuscripts to Wilmer W. Tanner, Department of Zoology and Entomology, Brigham Young University, Provo, Utah.
