## FROM THE EDITORS

The Comparative Civilization Review will seek to publish analytic studies and interpretive essays primarily concerned with (1) the comparison of whole civilizations, (2) the development of theories and methods especially useful in comparative civilizational studies, of (3) significant issues in the humanities or social science studied from a comparative civilizational perspective.

By "a comparative civilizational perspective" we mean (1) the use of evidence from more than one civilization (the various national traditions of the modern West being regarded, in this respect, as constituents of a single civilization, and (2) a method likely to throw new light either on the processes and structures of civilizations or on the problems of interpreting civilizations in diverse natural and analytic languages. A less essential consideration, but highly desirable in civilizational studies, is (3) some degree of incorporation of the perspectives, questions, and methods of both the humanities and the social sciences.

Once manuscripts are accepted for publication, authors are asked to send a disk/diskette of the manuscripts, prepared in Wordperfect: table, charts, and figures should be camera-ready to a 4.5 x 7.5 format.
