Rating System

In order to convey quickly the overall quality of a book, a rating appears in bold-face type after the bibliographical information.

- * Exceptional quality of merit. The asterisk is used sparingly and only in cases where the book deserves special recognition.
- A** Excellence. Books which receive a rating of **A** will add strength to a library and should find wide acceptance among young readers.
- B** Recommended for libraries which need additional books in a specific subject area. Generally books with a rating of **B** are dependable, if not outstanding.
- C** Will have appeal for some readers despite significant shortcomings. Should be purchased only after careful consideration.
- NR** Not Recommended.

Grade Level

The approximate *grade level* of the intended reader appears immediately after the rating. When the reviewer believes that a particular book will appeal to a wide range of readers, no upper limit is indicated. Many books, including picture books, find a favorable reader response far beyond the reading level indicated by the vocabulary, treatment of subject, or format.

Book Classification

Book classification follows the grade level. Books are given a two letter code, indicating the genre of the particular book.

| FI | Fiction | PT | Poetry |
| BI | Biography | NF | Nonfiction |
