Submittals

The *Comparative Civilizations Review* publishes analytical studies and interpretive essays primarily concerned with (1) the comparison of whole civilizations, (2) the development of theories and methods especially useful in comparative civilization studies, (3) accounts of intercivilizational contacts, and (4) significant issues in the humanities or social sciences studied from a comparative civilizational perspective.

By “a comparative civilizational perspective” we mean (1) the use of evidence from more than one civilization (the various national traditions of the modern West being regarded, in this respect, as constituents of a single civilization) and (2) a method likely to throw new light either on the origins, processes, or structures of civilizations or on the problems of interpreting civilizations.
