Summary of New Features CEAL Statistics Database 2005

1) Statistics ranking function was added.
   - Only members who have a valid account can access ranking function.
   - Ranking function is available for the following tables: Electronic Resources, Fiscal Support, Total Volume Holding, Serial Subscriptions & Non-purchased Serials. The default view includes all library types and regions.
   - The ranking filters are “type of library” (Canadian University, Private U.S. University, Public U.S. University, U.S. Non-University, and Canadian Non-University) and “region” (New England, Middle Atlantic, East North Central, West North Central, South Atlantic, East South Central, West South Central, Mountain, Pacific, and Canada).

2) Graph view was added to traditional table view.
   - The data shown in the graph version is the same as the table version.
   - The Y-axis is re-scalable for a better view of “Total Holdings and Unprocessed Backlog Materials,” “Fiscal Support,” and “Total Volume Holdings” tables.

3) Print friendly function was added.
   - Available in every table view as well as in View Ranking tables.
   - Microsoft Excel is required to view the print friendly version.
   - Ctrl+p to print in Print Friendly Version.

4) One sample account was created for potential members to allow them to view online survey forms content.
   - Library Name: ztest
   - Password: viewform
   - This ID and password allows users to “view” and “print” online forms only.

5) New fields have been added in the Electronic Resource table.
   - A total of 11 new data fields were added: CD Title data fields for C, J, K, non-CJK, with grand and subtotal fields; CD Count data fields for C, J, K, and non-CJK, with grand and subtotal fields; and a Memo field.

6) The system now retrieves old data from previous years in the Total Volume Holding Form.
   - Previous year’s data in the current year forms is retrieved automatically.
   - If there is no data for the immediate past year (ex. the member didn't input last year, or a new member has just joined for the current year) the previous year data can be input manually.
