Presentation Overview

- Intro
- Methods
- Results
- Conclusion

Intro

Methods

Results

Conclusion

Risk Factors

- Low family income, large family size, poor child-rearing techniques & parental criminality linked to juvenile delinquency (Howard, Dryden, & Johnson 1999)
- Strained family relationships, family conflict, poor communication skills contribute to rates of depression among children (Merrell, 2001)

Intro

Methods

Results

Conclusion

EBD

- Estimated 10-20% of school-age children experience mental health concerns (Mash & Dozois, 2002) - many are not identified and do not receive interventions.
- Students identified with Emotional and Behavioral Disorders (EBD) constitute just less than 1% of the school-age population (Wagner et al., 2005).
- Of those students identified as EBD, approximately 65% are 12 years of age or older (U.S. Department of Education, 2001).

Intro

Methods

Results

Conclusion

Common School Interventions

- Reactive
- Punishment
- Suspension and expulsion
- School psychologists or counselors
- Special education services

Intro

Methods

Results

Conclusion

Foundations of Mentoring

- Homers Odyssey
- Extended Families
- Heroic Legends
- Sports
- Business
- President Bush \$450 million

Intro

Methods

Results

Conclusion

Rationale

- Relationships with non-parental adults are vital assets for positive youth development (Scales, 2003)
- Studies of resilience among youth from at-risk backgrounds alerted scholars to protective functions that can be fulfilled by relationships with non-parental adults (Werner, 1995)

Intro

Methods

Results

Conclusion

What is a Mentor?

- Greater wisdom or experience
- Offers guidance or instruction intended to facilitate growth and development

“There is an emotional bond between mentor and mentee, a hallmark of which is a sense of trust”

(Freedman 1992)

Intro

Methods

Results

Conclusion

Mentors Can Help By...

- Enhancing Social Skills
- Improving Emotional Wellbeing through Listening & Dialogue
- Serving as a Role Model/Advocate
(Rhodes, 2002)
- Advocating Health and Safety
- Promoting Self Sufficiency (Jekielek, 2002)

Intro

Methods

Results

Conclusion

Benefits of School-based Mentoring

- Less Costly
- Identify More Children via the School Context
- School Resources Staff Administration
- More Convenient for Volunteers
- Time Commitment
- Mentors Feel Safer
- Establish Community Support within School

Dubois & Karcher (2005)

Intro

Methods

Results

Conclusion

Goal

"The goal of true mentoring is the development of the youth--not necessarily the solution of specific problems" (Ambrose, 1998)

Intro

Methods

Results

Conclusion

Positive Behavior Support

Targeted/Intensive: 3- 5% high- risk students

Selected: 7- 10% at-risk students (mentoring)

Universal: 85- 90% of students respond to SWPBS

Intro

Methods

Results

Conclusion

Question:

Is school-based mentoring an effective intervention for elementary students at-risk for emotional and behavioral disorders?

Intro

Methods

Results

Conclusion

Setting

- Elementary School in Central Utah
 - 532 Students
 - Over 50% free or reduced lunch
 - Ethnicity
 - 75% Caucasian
 - 21% Hispanic
 - 2% African American
 - 2% Other
- Student Support
 - Principal
 - .50 Advocate
 - .25 Psychologist

Intro

Methods

Results

Conclusion

Student Selection

- Systematic Screening For Behavior Disorders (SSBD) (Walker & Severson 1992)
 - Screens All Students
 - Internalizing & Externalizing
- Suggests Risk Level
 - Primary, Secondary, Tertiary

Intro

Methods

Results

Conclusion

Student Participants

- N = 17
 - 76 % male
- Ethnicity:
 - 70% Caucasian
 - 24% Hispanic
 - 6% African American
- Age:
 - Range 6-11yrs., M = 8.5yrs (sd = 1.84)
- Free or Reduced Lunch = 81%
- SSBD results:
 - Critical Events: range 1–6, M = 2.73 (sd = 1.62)
 - Adaptive: range 25-44, M = 33.67 (sd = 5.05)
 - Maladaptive: range 14-45, M = 29.60 (sd = 8.47)

Intro

School Social Behavior Scales (SSBS)

(Merrell, 2002)

- Teacher Rating
 - 64 Likert-scale items
 - Nationally normed
 - Evidence of reliability & validity
- Social Competence
 - Cooperates with other students
 - Shows self control
 - Sensitive to others feelings
- Antisocial Behavior
 - Is physically aggressive
 - Is easily irritated
 - Gets into trouble at school

School Social Behavior Scales
Second Edition
To Be Completed By Teacher or Other School Personnel for Students in Grades K-12

Identifying Information

Name of student: _____
School: _____
Grade: _____ Age: years: _____ months: _____ Sex: Male Female
Name of person completing form: _____
Date form completed: _____
Relationship of rater to student: _____
List the settings in which you observe or interact with this student: _____

Directions

After you have completed the identifying information section, please rate this student's behavior using all of the items on pages 2 and 3 of this rating form. Ratings should be based on your observations of this student's behavior **during the past three months**. The rating points after each item are based on the following format:

Never If the student does not exhibit a particular behavior, or if you have not had an opportunity to observe a particular behavior, circle 1, which indicates *Never*.

Frequently If the student often exhibits a particular behavior, circle 5, which indicates *Frequently*.

Sometimes Circle the numbers 2, 3, or 4, (which indicate *Sometimes*) if the student exhibits the behavior somewhere in between the two extreme rating points, based on your judgment of how frequently it occurs. The rating points after each item appear in the following format:

NEVER 1 2 3 4 5
SOMETIMES FREQUENTLY

Please complete all items, and do not circle between numbers. If you have any additional comments about this student, write them in the space provided at the top of page 4.

Home and Community Social Behavior Scales (HCSBS)

(Merrell & Caldarella, 2002)

- Parent Rating
 - Companion to the SSBS
 - 64 Likert-scale items
 - Nationally normed
 - Evidence of reliability & validity
- Social Competence
 - Cooperates with peers
 - Shows self control
 - Sensitive to others feelings
- Antisocial Behavior
 - Is physically aggressive
 - Is easily irritated
 - Gets into trouble at school or in community

Home & Community Social Behavior Scales
To Be Completed By Parent, Guardian, or Supervisor of Children or Adolescents Ages 5-18

Identifying Information

Name of child or adolescent: _____
School: _____
Grade: _____ Age: years: _____ months: _____ Sex: Male Female
Name of person completing form: _____
Date form completed: _____
Relationship of rater to child/adolescent: _____
List the settings in which you observe or interact with this child or adolescent: _____

Directions

After you have completed the *Identifying Information* section, please rate this child or adolescent's behavior using all of the items on pages 2 and 3 of this rating form. Ratings should be based on your observations of this child or adolescent's behavior **during the past three months**. The rating points after each item are based on the following format:

Never If the child or adolescent does not exhibit a particular behavior, or if you have not had an opportunity to observe a particular behavior, circle 1, which indicates Never.

Frequently If the child or adolescent often exhibits a particular behavior, circle 5, which indicates Frequently.

Sometimes Circle the numbers 2, 3, or 4, (which indicate *Sometimes*) if the child or adolescent exhibits the behavior somewhere in between the two extreme rating points, based on your judgment of how frequently it occurs. The rating points after each item appear in the following format:

NEVER 1 2 SOMETIMES 3 4 FREQUENTLY 5

Please complete all items, and do not circle between numbers. If you have any additional comments about this child or adolescent, write them in the space provided at the top of page 4.

Comparison: Secondary vs. Tertiary

Intro

Methods

Results

Conclusion

Student Survey

100% responded that they would like to be in the mentoring program again

71% noted help with academics as the most important part of having a mentor

What did you like about having a mentor ?

"A friend"

"She's nice, knows about me and cares"

"Someone to trust"

"We talk, she listens"

Intro

Methods

Results

Conclusion

Teacher Survey

100% noted positive changes for those students who were mentored.

"I wish more of my students could benefit from it"

"Self-confidence has dramatically increased this school year"

"I love that Martin truly looked forward to this time, as was shown by the big smile on his face each time she appeared at our door. This is worth more than completing 100 assignments on time!! "

Intro

Methods

Results

Conclusion

Mentor Survey

69% would like to participate again.

40% would like more information on student needs.

36% wanted more contact with the teacher.

"They have touched my life for good"

"I like feeling that I can make a difference in a child's life"

"It is very rewarding to help a child set goals and achieve them"

"I like seeing them become more self confident"

Intro

Methods

Results

Conclusion

Parent Survey

83% said they would like their child to participate in the program again.

"He appears to feel better about himself"

"It helps them cope with problems and be better students!"

"We love the program!"

"Boost in self-confidence"

Intro

Methods

Results

Conclusion

Limitations

- Data from just 1 school
- No control group
- Small number of participants
- Brief intervention
- No measure of relationship strength

Intro

Methods

Results

Conclusion

Future Directions

- Addressing limitations
- Replicating the evaluation
- Extending the program
- Developing and refining mentoring materials
