Review

Through the use of beautiful photographs and interesting facts about animals, this book helps children discover that numbers are all around us! The book begins with number one and continues through number ten. Also featured on each page is an interesting fact about the pictured animal that helps keep readers engaged.

This book captivates the interest of young and old readers alike because of the stunning photography and fun facts about each animal. There are numerous books that teach about numbers one through ten, but the interesting facts on each page really set this book apart. Having these fun bits of information, which are very succinct, keeps young readers entertained. The pictures also provide a great opportunity for children to practice number recognition, counting, and one-to-one correspondence.
