**Publication Year:** 2014  
**ISBN:** 9781626722842  
**Number of Pages:** 28  
**Interest Level:** Toddler  
**Rating:** Outstanding

## Review

Did you know that broccoli can be purple and cherries can be yellow? In a beautifully rich board book, Bass helps young minds explore colors by first giving a fruit or vegetable in it's expected color and then opening the door to the varieties in which it can also come in. Each page offers a smooth transition from known to unknown, and invites further development of creativity by encouraging thinking outside the box.

Edible Colors will aid in the education of colors and it will also enrich toddlers by giving alternate possibilities. This adorable board book can help toddlers to recognize that not only is different okay, but sometimes more interesting. Toddlers and parents alike will flip the thick board book pages over and over again as they point out, name, and discover the magic of colors.
