## Review

Let's go to the playground! Take your finger and trace a path through this book to get us there. We'll cross a river, take a path through the clouds, and take a trip through a dark cave making new friends along the way. Follow the children, with the red arrows guiding your path, through the bright artwork to finally make it to the playground.

This bright, colorful book is such a delight to read. Children will enjoy how interactive and playful each page is. The artwork is whimsical and the colors pop right off the pages. The red arrows are very small and make it somewhat difficult to distinguish what exactly you are supposed to do on each page, but once you've read the book a few times it is not a worry. This is a wonderful book that will expand your child's imagination and problem-solving skills. And once you pick up this book you will, like the characters in the book, want to do it again and again.
