## Book Review

### Soup Day

It's soup day! A young girl and her mother go to the grocery store to pick out fresh ingredients to make soup on the cold day. The mom shows the girl how to cut vegetables, pour the broth, and pick the perfect noodles. Together they play blocks, dress up, and read while they wait for the soup to cook. When the girl's dad comes home, it is time to eat the soup together!

This is a heart warming story of mother and daughter spending time together. The story tells the step-by-step process of making vegetable soup. This is great for young children that are interested in the kitchen and cooking. The sights, sounds, and smells of making soup are brought to life with wonderful text and illustrations. The illustrations make the food look so real that children will want to make their own soup with the recipe in the back of the book.
