Tomo: Adventures in Counting

Join Tomo and his best friend for an adventure on the seas! Spot snoozing polar bears, swimming jellyfish, and sparking stars as they count from one to ten. Colorful numbers top the page, with adorable illustrations depicting that value underneath. A two page spread with small icons of each of the pages allow readers to count more fluidly from one to ten with the pictures and numbers all in one spot!

An adorable board book to help little ones learn to count! The illustrations are colorful and fun, and the book is printed on good quality material. The book starts out with the number one, but accompanying text that starts to tell a story, then turns into a list at number three. For the most part, the objects that are to be counted are intuitive; however, number nine expects readers to count the waves while the whales on the page seem more prominent. Regardless, with help, little readers will enjoy counting the things in this book as they join Tomo for another awesome adventure.
