## Book Review

# Red-Eyed Tree Frogs

Red-eyed tree frogs are bright green and have orange feet and big red eyes. They are very small, and they're equipped with sticky feet to help them climb on leaves and branches. These fascinating creatures are nocturnal and sleep during the day. What are those red eyes for? If an animal comes close to the hiding frog, it quickly opens its eyes and startles the animal, giving the frog more time to escape! We learn these interesting facts, along with the life cycle from egg to tadpole to frog, habitat, and more in Red-Eyed Tree Frogs.

Brilliant photographs with vibrant colors have this frog fairly jumping from the pages! There are several QR codes within the book leading to more facts and activities online, including a video of this amazing frog in action. Large font gives detailed and interesting facts flowing smoothly with captivating photos to hold the attention of readers of all ages. Thoughtful questions for discussion at the back of the book, and glossary of terms used in the text help the reader make a lasting connection with red-eyed tree frogs.
