Fergus and Zeke: At The Science Fair

The science fair is coming up and the students need to create an experiment. Fergus and Zeke are very excited to participate in the science fair. The trouble is, they can't think of a good experiment that will work for them. Lucy, a student in the class, creates a science experiment where she trains Fergus and Zeke to run in a maze. Fergus and Zeke practice with Lucy, and they even train Lucy to cheer for them so that they will run faster. Everyone cheers and claps after Lucy's demonstration, and her project is a success!

This is a fun book that teaches many different things. Fergus and Zeke have to persevere when trying to come up with a project. They continue to try to have a project for the science fair even when they are already in it. They also use some great scientific method vocabulary. This book could be used in many ways to help engage and enhance a young scientist. The illustrations in the book are colorful, fun, and helpful to the reader. This book is a fun beginner chapter book that will keep kids engaged, which can help with their reading stamina. It is a great book to help kids transition from picture books to chapter books. Overall, the story is simple, well paced, and intriguing.
