Born in the Wild follows a variety of baby animals—like giraffes, panda bears, and otters—as they are born and explains how those animals grow with their families in their respective environments. Baby animals have many needs like food, shelter, protection and play, just like baby humans.

Born in the Wild beautifully and simply depicts the early days of baby animal life. Each page includes a realistic illustration of a baby animal and its family with a simple informative fact about how those babies survive. This book would make a great conversation starter for parents and young children about how all creatures need many of the same things to thrive. Eye-catching and educational, the book is sure to help instill a respect and awareness of the world around us and the creatures it contains. This educational board book would be a great addition for any animal lover's library.
