Flo, Faye and Franny, also known as the Flying Flamingo Sisters, are from a family of pilots. They travel the world and break all kinds of records. On one particular adventure, the sisters' parents go missing. Determined to find them, they dodge the clutches of their evil uncle and perform aerial acrobatics in a circus until a secret map leads them to their parents and a secret family treasure. With courage, strength, and abundant knowledge, the girls navigate sticky situations and bring their family back together again.

With a full cast of capable voice actors, this book is enjoyable to listen to. While dates are never mentioned, it appears to take place in the 1930s. The audio capitalizes on this, presenting the narration like an old fashioned radio show and the music like that of early black and white action films. The book's charming storyline is sure to keep readers attention with its unpredictable twists and turns. The characters are distinct and likable, and the Flamingo Sisters are brave, independent, and kind, making them great role models. They also learn that though we are different, we each have important roles to play.
