Book Review

From 1 to 10

From the bear's one belly to the cat's ten whiskers, all the animals have a number to teach, progressing from one to ten.

Dutch artist Van Hout offers a direct counting book with bold, unique illustrations. Each animal takes up a two-page spread along with one word and one number. The bold and bright multimedia pieces of art give the book a creative spark. The use of chalk and paint gives the pictures interesting texture, and the bold primary colors, which change on each page, highlight each concept. This is a great book to build beginning numerical literacy skills, and caregivers will find some helpful tips at the end on teaching children to count with confidence.
