Engineers do a lot of things. They fix things, they build things, and they learn from their mistakes. Baby may not be an engineer yet, but Baby can do these things. Baby can ask questions and help others and do all sorts of other things to see what it might be like to be an engineer.

This is a good board book to inspire toddlers with an interest in engineering. The illustrations are endearing and colorful enough to likely catch a baby's attention. They are also very inclusive, with various races and genders depicted.
