ERRATA

Errors occurred in several citations contained in the article "Changes in kit fox–coyote–prey relationships in the Great Basin Desert, Utah," by Wendy M. Arjo, Eric M. Gese, Tim J. Bennett, and Adam J. Kozolowski, from the July 2007 issue (67:389–401) of the Western North American Naturalist. Several of the cited authors’ names were erroneously changed during the editing process. Throughout the article, B.L. Cypher appeared as B.L. Cipher; K. Ralls appeared as K. Walls; M.R.M. Otten appeared as M.R.M. Often; and R.A. Garrott appeared as R.A. Garroted. The following are the correct full citations:

We apologize for any misunderstandings that these errors might have caused.
INFORMATION FOR AUTHORS

The Western North American Naturalist welcomes previously unpublished manuscripts pertaining to the biological natural history of western North America, including western Canada and all of Mexico. Preference will be given to manuscripts of up to 12,000 words. Simple species lists are discouraged.

SUBMIT MANUSCRIPTS to Mark C. Belk, Editor, Western North American Naturalist, wnann@byu.edu, or via mail to 190 MLBM, Brigham Young University, Provo, UT 84602-0200. An accompanying cover letter must include phone number(s) of the author submitting the manuscript, FAX number, and e-mail address; the letter must also provide information describing the extent to which data, text, or illustrations have been used in other papers or books that are published, in press, submitted, or soon to be submitted elsewhere. Authors should adhere to the following guidelines; manuscripts not so prepared may be returned for revision.

MANUSCRIPT PREPARATION. In general, the West- ern North American Naturalist follows recommendations in Scientific Style and Format: The CSE Manual for Authors, Editors, and Publishers, 7th edition (Rockefeller University Press, New York; Available from: www.councilscienceeditors.org). However, we do differ in our treatment of entries in Literature Cited and other minor stylistic matters. Authors should consult the most recent issue of the Western North American Naturalist for formatting guidelines.

TYPE AND DOUBLE SPACE all materials, including literature cited, tables, and figure legends. Avoid hyphenated words at the right-hand margins. Use the word processor’s font attributes to indicate italics, superscripts, subscripts, and so forth. Use standard page format (22×28 cm), leaving 2.5-cm margins on all sides.

SUBMIT A PDF or word processor document. If submitting by postal mail, send 1 copy of the manuscript with laser-printed or photocopied figures. Number all pages and assemble the document in the following order: title page, abstract and key words, text, acknowledgments, literature cited, appendices, tables, figure legends, figures.

TITLE PAGE includes an informative title no longer than 15 words, names and addresses of authors, a running head of fewer than 40 letters and spaces, footnotes to indicate change of address and author to whom correspondence should be addressed if other than the first author.

ABSTRACT states the purpose, methods, results, and conclusions of the research. It is followed by 6–12 key words, listed in order of decreasing importance, to be used for indexing.

TEXT has centered main headings printed in all capital letters; 2nd-level headings are centered in upper- and lowercase letters; 3rd-level headings begin paragraphs.

VOUCHER SPECIMENS. Authors are encouraged to designate, properly prepare, label, and deposit high-quality voucher specimens and cultures documenting their research in an established permanent collection, and to cite the repository in publication.

REFERENCES IN THE TEXT are cited by author and date: e.g., Martin (1998) or (Martin 1998). Multiple citations should be separated by commas and listed in chronological order. Use "et al." after name of 1st author for citations having more than 2 authors.

ACKNOWLEDGMENTS, under a centered main heading, include special publication numbers when appropriate.

LITERATURE CITED, also under a centered main heading, lists references alphabetically in the following formats:

TABLES are double spaced on separate sheets and designed to fit the width of either a single column (6.7 cm) or a page (14.0 cm). Use lowercase letters to indicate footnotes whenever possible.

FIGURES are submitted initially with the manuscript; editors may suggest changes. Lettering on figures should be large enough to withstand reduction to 1- or 2-column width. Originals must be no larger than 22×28 cm.

NOTES. If the manuscript would be more appropriate as a short communication or note, follow the above instructions but do not include section headings.

A CHARGE of $55 per page is made for articles published; the rate for individual subscribers will be $40 per page. However, manuscripts with color figures, complex tables, or numerous photographs may be assessed an additional charge. Reprints may be purchased at the time of publication (an order form is sent with the proofs).

FINAL CHECK:
- Cover letter explaining any duplication of information and providing phone number(s), FAX number, and e-mail address
- A PDF file, word processor file, or 1 hard copy of the manuscript
- Conformity with instructions
- Electronic copies or photocopies of illustrations
## CONTENTS

### Articles

- **Variation in ant populations with elevation, tree cover, and fire in a pinyon-juniper-dominated watershed**
  
  Eugénie M. MontBlanc, Jeanne C. Chambers, and Peter F. Brussard
  
  469

- **Growth and demography of one population of the lizard *Sceloporus mucronatus mucronatus***
  
  Angela M. Ortega-León, Emily R. Smith, J. Jaime Zúñiga-Vega, and Fausto R. Méndez-de la Cruz
  
  492

- **Modeling aboveground biomass of *Tamarix ramosissima* in the Arkansas River Basin of southeastern Colorado, USA**
  
  Paul Evangelista, Sunil Kumar, Thomas J. Stohlgren, Alycia W. Crall, and Gregory J. Newman
  
  503

- **Diatom species composition and ecology of the Animas River Watershed, Colorado, USA**
  
  Gerald V. Sgro, John B. Poole, and Jeffery R. Johansen
  
  510

- **Moistened seeds increase rodent trap success**
  
  John C. Tull and Michael W. Sears
  
  520

- **The scotopic visual sensitivity of four species of trout: a comparative study**
  
  Russell B. Rader, Timberley Belish, Michael K. Young, and John Rothlisberger
  
  524

- **Censusing bobcats using remote cameras**
  
  Eveline S. Larrucea, Gianluca Serra, Michael M. Jaeger, and Reginald H. Barrett
  
  538

- **Long-term vegetation dynamics in a cut western juniper woodland**
  
  Jonathan D. Bates, Richard F. Miller, and Tony Svejcar
  
  549

- **Forest health impacts of bark beetles, dwarf mistletoe, and blister rust in a Lake Tahoe Basin mixed conifer stand**
  
  
  562

- **Population density, biomass, and age-class structure of the invasive clam *Corbicula fluminea* in rivers of the lower San Joaquin River watershed, California**
  
  Larry R. Brown, Janet K. Thompson, Karen Higgins, and Lisa V. Lucas
  
  572

- **Large mixed-species dispersal flights of predatory and scavenging aquatic Heteroptera and Coleoptera, northern Arizona, USA**
  
  Lawrence E. Stevens, John T. Polhemus, Richard S. Durfee, and Carl A. Olson
  
  587

### Notes

- **Home range size of Black-backed Woodpeckers in burned forests of southwestern Idaho**
  
  Jonathan G. Dudley and Victoria A. Sabin
  
  593

- **New distribution records for the Querétero dusty rattlesnake *Crotalus aquilus* (Viperidae), with comments on morphology and habitat use**
  
  Jesse M. Meik, Estrella Mocciño Deloya, and Kirk Setser
  
  601

- **Observations on an association between the weevil *Scaphomorphus tricellularissimus* (Say) and two *Astragalus* species on selenium-rich soils in Carbon County, Utah**
