Mass Mailings Made Simple

This do-it-yourself job can save an office a great deal of money.

By Bonnie Brinton Anderson, Larysa V. Oprya and Marshall B. Romney

April 2005

You want to tell 130 clients about several new professional services and send them updated fee schedules. You considered outsourcing the project to a direct-mail ad agency and found the setup alone for each variation of the letter was $65—way over your budget. Worry not. This is a job your support staff should be able to handle after reading this article.

Key to Instructions

To help readers follow the instructions in this article, we used two different typefaces:

- **Boldface type** is used to identify the names of icons, agendas and URLs.
- **Sans serif type** shows commands and instructions users should type into the computer and the names of files.

We'll use Microsoft Office's *Mail Merge* function, which merges and integrates documents and data sources, to customize the letters. The final product will be 130 personal letters to each client’s contact person.

The setup takes just a few minutes. You have two options: Use the *Mail Merge* toolbar (exhibit 1, below)—a shortcut method that you'll probably prefer once you get the hang of it—or the wizard, which takes you through the process step-by-step. We'll demonstrate the process with the wizard so you can see how each step works.

**Exhibit 1**

To open the wizard, click on **Tools**, point to **Letters and Mailing** and click on **Mail Merge**. Your screen should resemble exhibit 2; however, yours obviously won't have the main document letter we prepared to illustrate the process. Notice that our letter lacks a contact person’s name, an address or a salutation; we will add that later. Notice, too, that on the bottom right-hand side of the screen the wizard is ready for you to launch the first of six steps.

**Exhibit 2**

**Step 1:** Under **Select document type**, click on **Letters** because that is the type of document you want to create. Then click on **Next: Starting document** at the bottom right of the screen, to bring up the screen shown in exhibit 3.

**Exhibit 3**

**Step 2:** Under **Select starting document**, choose the setup for your letter from the following options: If you are starting from scratch, click on **Use the current document**. If you want to use a template, click on **Start from a template**. And if you already have a saved letter you want to open, edit and send, click on **Start from existing document**.

Since you do not have a letter ready, select **Use the current document** and then compose your letter.

Then click on **Next: Select recipients** (exhibit 4).

**Exhibit 4**

The setup takes just a few minutes. You have two options: Use the *Mail Merge* toolbar (exhibit 1, below)—a shortcut method that you’ll probably prefer once you get the hang of it—or the wizard, which takes you through the process step-by-step. We’ll demonstrate the process with the wizard so you can see how each step works.
That moves you to step 3 and produces the screen shown in exhibit 5.

**Exhibit 5**

---

**Step 3:** Insert the addresses of your clients by choosing one of the first two options shown in exhibit 4, or you can type a new list (that process will be described later). In our example, since we have the information stored in an Access database table, we select *Use an existing list* under *Select recipients* and when we click on *Browse* to find the list, the *Select Data Source* screen appears (exhibit 6, below).

**Exhibit 6**

To browse through your folders for the address table, click on the down arrow next to *My Data Sources*. Find the desired database, click on it, and the *Select Table* dialog box appears (exhibit 7, below). It lists all the tables available in that database. We have highlighted the *Client* table.

**Exhibit 7**

If your client list is in *Outlook*, click *Select from Outlook contacts* (exhibit 8).

**Exhibit 8**
That evokes the Select Contact List Folder (exhibit 9).

Exhibit 9

If you wish to create a new list, click on Type a new list and Create (exhibit 10).

Exhibit 10

That brings up the New Address List screen (exhibit 11, below).

Exhibit 11

Fill out each client’s information and click on New Entry for each additional entry. After entering all the names and addresses, click on Close and name and save your new list so you can use or edit it later.

For those readers following along using Word, please note that you will not be able to proceed to step 4 until you have at least one recipient established.

Exhibit 12
Step 4: Now it is time to write or edit your existing letter so click on **Next: Write your letter** (exhibit 12, above). Click on **Next** to evoke the **Mail Merge** screen (exhibit 13, below).

**Exhibit 13**

Begin by clicking on **Address block** to specify the address elements. As shown in exhibit 14, below, you can choose one of many different formats for the person's name, whether to include the company name in the address and whether to insert the postal address.

**Exhibit 14**

If you are using Microsoft Access, click on the **Match Fields** option (see bottom of exhibit 14). That brings up the **Match Fields** screen (exhibit 15), which requires a link for each element of information (last name and first name, for example) to its corresponding database field.

**Exhibit 15**
After you've matched the fields and clicked on OK, you're ready to add the greeting line. Go to the Mail Merge screen (exhibit 13) and click on Greeting Line to specify the greeting elements. Fill in the requested information (exhibit 16) and click on OK.

Exhibit 16

Return to the Mail Merge screen (exhibit 17) and click on Next: Preview your letters. That brings up the screen shown in exhibit 18.

Exhibit 17

You now can preview each custom letter by using the back (<<) and forward (>>) arrows or by clicking on Find a recipient. Note in exhibit 18 that we used the arrows to display our 130th recipient. Be aware that you still can make changes to the letters, such as editing the recipient list or excluding recipients by selecting the appropriate function.

Exhibit 18

May 5, 2009
Mrs. Elizabeth St. James
Shadow Box
420 N 500 W
Provo, UT 84601

Dear Mrs. St. James,

With the new fiscal year approaching, we would like to thank you for the opportunity to associate with you in the past and anticipate another productive year.

We wish to inform you of our new rates:
Clinical $49/hour
Staff $35/hour
Manager $120/hour
Partner $150/hour

As always, the fee for any service depends on the level of expertise required.

We look forward to working with you this year.

Sincerely,

Return to the Mail Merge screen and click on Next: Complete the merge (exhibit 19).

Exhibit 19
• Step 5: At this point you can complete the merge setup, or if you wish, you can click on Previous: Write your letter and further edit the letters or print them.

As you can see, Mail Merge is a powerful tool that will save you time and money while creating professional, personalized letters. You also can use it to set up customized e-mail messages, envelopes and labels or a directory of addresses.
