NOTICE TO CONTRIBUTORS

Original manuscripts in English pertaining to the biological natural history of western North America and intended for publication in the Great Basin Naturalist should be directed to Brigham Young University, Stephen L. Wood, Editor, Great Basin Naturalist, Provo, Utah 84602. Those intended for the Great Basin Naturalist Memoirs should be similarly directed, but these manuscripts are not encumbered by a geographical restriction.

Manuscripts. Two copies of manuscripts are required. They should be typewritten, double spaced throughout on one side of the paper, with margins of at least one inch on all sides. Use a recent issue of either journal as a format, and the Council of Biology Editors Style Manual, Third Edition (AIBS 1972) in preparing the manuscript. An abstract, about 3 percent as long as the text, but not exceeding 200 words, written in accordance with Biological Abstracts guidelines, should precede the introductory paragraph of each article. Authors may recommend one or two reviewers for their article. All manuscripts receive a critical peer review by specialists in the subject area of the manuscript under consideration.

Manuscripts that are accepted and that are less than 100 printed pages in length will automatically be assigned to the Great Basin Naturalist. Those manuscripts larger than 100 printed pages in length will be considered for the Memoirs series.

Illustrations and Tables. All illustrations and tables should be made with a view toward having them appear within the limits of the printed page. Illustrations that form part of an article should accompany the manuscript. Illustrations should be prepared for reduction by the printer to either a single-column (2½ inches) or double-column (5½ inches) width, with the length not exceeding 7½ inches.

Costs Borne by Contributor. Contributors to the Great Basin Naturalist should be prepared to donate from $10 to $30 per printed page toward publication of their article (in addition to reprint costs outlined in the schedule below). Authors publishing in the Great Basin Naturalist Memoirs may be expected to contribute $35 per printed page in addition to the cost of the printed copies they purchase. No printed copies are furnished free of charge. A price list for reprints and an order form are sent with the galley proof to contributors.

Great Basin Naturalist Memoirs

TABLE OF CONTENTS

Review of tularemia in Utah and the Great Basin. Harold E. Stark ........................................... 103

Chemical composition of some important plants of southeastern Utah summer ranges related to mule deer reproduction. Jordan C. Pederson and K. T. Harper ................. 122

Emergence data and artificial rearing media for an aspen bark beetle, Trypophloeus populi (Coleoptera: Scolytidae). David A. Stewart, Gary M. Booth, Jerold L. Petty ........................................... 129

New synonymy and new species of American bark beetles (Coleoptera: Scolytidae), Part VIII. Stephen L. Wood ........................................... 133

Annual energy budgets for three common rodent species in the northern Great Basin. R. Kent Schreiber ........................................... 143

Preliminary survey of raptor species in the Manti Division, Manti-LaSal National Forest. Stephen G. Jones ........................................... 155

Vegetation response to a moisture gradient on an ephemeral stream in central Arizona. Deborah Ann Bloss and Jack D. Brotherson ........................................... 161

Ecological and community relationships of Eriogonum corynobosum (Polygonaceae) in the Uinta Basin, Utah. Jack D. Brotherson and Karen J. Brotherson ........................................... 177

Variation in hemoglobin types in the deer mouse (Peromyscus maniculatus) along an altitudinal gradient. David Wasserman and Donald J. Nash ........................................... 192

First record of Patapius spinosus in Idaho and Nevada (Hemiptera: Leptopodidae). Donald R. Brothers ........................................... 195

Bee visitation of Phlox bryoides (Polemoniaceae). V. J. Tepedino ........................................... 197

Ecological distribution of rodents in Canyonlands National Park, Utah. David M. Armstrong ........................................... 199
