This End Matter is brought to you for free and open access by the Western North American Naturalist Publications at BYU ScholarsArchive. It has been accepted for inclusion in Great Basin Naturalist by an authorized editor of BYU ScholarsArchive. For more information, please contact scholarsarchive@byu.edu, ellen_amatangelo@byu.edu.
NOTICE TO CONTRIBUTORS

Original manuscripts in English pertaining to the biological natural history of western North America and intended for publication in the Great Basin Naturalist should be directed to Brigham Young University, Stephen L. Wood, Editor, Great Basin Naturalist, Provo, Utah 84602. Those intended for the Great Basin Naturalist Memoirs should be similarly directed, but these manuscripts are not encumbered by a geographical restriction.

Manuscripts. Two copies of manuscripts are required. They should be typewritten, double spaced throughout on one side of the paper, with margins of at least one inch on all sides. Use a recent issue of either journal as a format, and the Council of Biology Editors Style Manual, Third Edition (AIBS 1972) in preparing the manuscript. An abstract, about 3 percent as long as the text, but not exceeding 200 words, written in accordance with Biological Abstracts guidelines, should precede the introductory paragraph of each article. Authors may recommend one or two reviewers for their article. All manuscripts receive a critical peer review by specialists in the subject area of the manuscript under consideration.

Manuscripts that are accepted and that are less than 100 printed pages in length will automatically be assigned to the Great Basin Naturalist. Those manuscripts larger than 100 printed pages in length will be considered for the Memoirs series.

Illustrations and Tables. All illustrations and tables should be made with a view toward having them appear within the limits of the printed page. Illustrations that form part of an article should accompany the manuscript. Illustrations should be prepared for reduction by the printer to either a single-column (2½ inches) or double-column (5½ inches) width, with the length not exceeding 7½ inches.

Costs Borne by Contributor. Contributors to the Great Basin Naturalist should be prepared to donate from $10 to $30 per printed page toward publication of their article (in addition to reprint costs outlined in the schedule below). Authors publishing in the Great Basin Naturalist Memoirs may be expected to contribute $35 per printed page in addition to the cost of the printed copies they purchase. No printed copies are furnished free of charge. A price list for reprints and an order form are sent with the galley proof to contributors.

Great Basin Naturalist Memoirs

TABLE OF CONTENTS

Vegetative and edaphic factors affecting abundance and distribution of small mammals in southeastern Oregon. George A. Feldhamer .................................................. 207

Influence of precipitation and temperature on ring, annual branch increment, and needle growth of White Fir and Douglas-fir in central Utah. John D. Shane and Kimball T. Harper .................................................. 219

Potential use of Great Salt Lake water for lobster culture. Roger W. Mickelsen, Richard A. Heckmann, and Rex C. Infanger .................................................. 231

Nearctic stonefly genera as indicators of ecological parameters (Plecoptera: Insecta). Richard W. Baumann .................................................. 241

Competitive displacement as a factor influencing phytoplankton distribution in Utah Lake, Utah. Lorin E. Squires, Mark C. Whiting, Jack D. Brotherson, and Samuel R. Rushforth .................................................. 245

Ground nesting and aggressive behavior by the Swainson’s Hawk (Buteo swainsoni). Neil D. Woffinden and James A. Mosher .................................................. 253

Response of reptile populations to different land management practices on the Idaho National Engineering Laboratory Site. Timothy D. Reynolds .................................................. 255

Decreases of juniper woodland in the Utah and Salt Lake valleys since settlement. E. M. Christensen and J. D. Brotherson .................................................. 263

Competition between harvester ants and rodents in the cold desert. Dan S. Landeen, Clive D. Jorgensen, and H. Duane Smith .................................................. 267

Food habits of burrowing owls in southeastern Idaho. R. L. Gleason and T. H. Craig .................................................. 274

Flora of the Lee Creek valley, Alberta. R. Keith Shaw .................................................. 277
