This End Matter is brought to you for free and open access by the Western North American Naturalist Publications at BYU ScholarsArchive. It has been accepted for inclusion in Great Basin Naturalist by an authorized editor of BYU ScholarsArchive. For more information, please contact scholarsarchive@byu.edu, ellen amatangelo@byu.edu.
NOTICE TO CONTRIBUTORS

Manuscripts intended for publication in the Great Basin Naturalist or Great Basin Naturalist Memoirs must meet the criteria outlined in paragraph one on the inside front cover. They should be directed to Brigham Young University, Stephen L. Wood, Editor, Great Basin Naturalist, 290 Life Science Museum, Provo, Utah 84602. Three copies of the manuscript are required. They should be typewritten, double spaced throughout on one side of the paper, with margins of at least one inch on all sides. Use a recent issue of either journal as a format, and the Council of Biology Editors Style Manual, Fourth Edition (AIBS 1978) in preparing the manuscript. An abstract, about 3 percent as long as the text, but not exceeding 200 words, written in accordance with Biological Abstracts guidelines, should precede the introductory paragraph of each article.

Authors may reduce their typesetting costs substantially (up to half) by sending a copy of their article on an IBM floppy disk in WordPerfect software along with the three hard copies mentioned above. Request instructions before sending disk.

All manuscripts receive a critical peer review by specialists in the subject area of the manuscript under consideration. Authors may recommend one or two reviewers for their article.

Accepted manuscripts less than 100 printed pages in length will automatically be assigned to the Great Basin Naturalist. Those larger than 100 printed pages will be considered for the Memoirs series.

Illustrations and Tables. All illustrations and tables should be made with a view toward having them appear within the limits of the printed page. The original illustrations or glossy photoprints of them should accompany the manuscript. Illustrations should be prepared for reduction by the printer to either single-column (2 3/4 inches) or double-column (5 3/4 inches) width, with the length not exceeding 7 3/4 inches.

Costs Borne by Contributor. Contributors to the Great Basin Naturalist should be prepared to donate from $10 to $40 per printed page toward publication of their article (in addition to reprint costs). Excessive or complex tables requiring typesetting may be charged to the author at cost. Authors publishing in the Great Basin Naturalist Memoirs may be expected to contribute $40 per printed page in addition to the cost of the printed copies they purchase. No reprints are furnished free of charge.

Reprint Schedule for the Great Basin Naturalist

100 copies, minimum cost for 2 pages, $26.
Each additional 2 pages, $6.
Each additional 100 copies, $4 for each 2 pages.
Examples: 300 copies of 10 pages = $82; 200 copies of 13 pages = $86.

Great Basin Naturalist Memoirs

No. 3 The endangered species: a symposium. $6.
No. 4 Soil-plant-animal relationships bearing on revegetation and land reclamation in Nevada deserts. $6.
No. 5 Utah Lake monograph. $8.
No. 6 The bark and ambrosia beetles of North and Central America (Coleoptera: Scolytidae), a taxonomic monograph. $60.
No. 7 Biology of desert rodents. $8.
No. 8 The black-footed ferret. $10.
TABLE OF CONTENTS

Biology of Red-necked Phalaropes (Phalaropus lobatus) at the western edge of the Great Basin in fall migration. Joseph R. Jehl, Jr. ................................................................. 185

Some relationships of black-tailed prairie dogs to livestock grazing. Craig J. Knowles. ................................................................. 198

Effect of excluding shredders on leaf litter decomposition in two streams. James R. Barnes, J. V. McArthur, and C. E. Cushing. .............................. 204

Three-year surveillance for cestode infections in sheep dogs in central Utah. Ferron L. Andersen, Lauritz A. Jensen, H. Dennis McCurdy, and Craig R. Nichols. ............................................................................... 208

Dam-raised fawns, an alternative to bottle feeding. Kathrin M. Olson-Rutz, Philip J. Urness, and Laura A. Urness. ............................................................. 217

Subspecific identity of the Amargosa pupfish, Cyprinodon nevadensis, from Crystal Spring, Ash Meadows, Nevada. Jack E. Williams and James E. Deacon. ............................................................................... 220

Two aberrant karyotypes in the sagebrush lizard (Sceloporus graciosus): triploidy and a "supernumerary" oddity. Pamela Thompson and Jack W. Sites, Jr. .......................................................... 224

Food habits of clouded salamanders (Aneides ferreaus) in Curry County, Oregon (Amphibia: Caudata: Plethodontidae). John O. Whitaker, Jr., Chris Maser, Robert M. Storm, and Joseph J. Beatty. .................................................. 228

Wintering bats of the upper Snake River plain: occurrence in lava-tube caves. David L. Genter. .......................................................................................... 241

Growth rates of mule deer fawns under different winter conditions. Richard M. Bartmann. .......................................................................................... 245

Denning habitat and diet of the swift fox in western South Dakota. Daniel W. Uresk and Jon C. Sharps. ........................................................................ 249

New taxa and combinations in the Utah flora. Stanley L. Welsh. .......................................................................................... 254

New taxa in miscellaneous families from Utah. Stanley L. Welsh. .......................................................................................... 261

New synonymy and new species of American bark beetles (Coleoptera: Scolytidae), Part XI. Stephen L. Wood. ........................................................................ 265

Estimates of site potential for Douglas-fir based on site index for several southwestern habitat types. Robert L. Mathiason, Elizabeth A. Blake, and Carleton B. Edminster. ........................................................................ 281

Wintering mule deer preference for 21 accessions of big sagebrush. Bruce L. Welch and E. Durant McArthur. ........................................................................ 281

Coleoptera of the Idaho National Engineering Laboratory: an annotated checklist. Michael P. Stafford, William F. Barr, and James E. Johnson. ........................................................................ 287

Microhabitat affinities of Gambel oak seedlings. Ronald P. Neilson and L. H. Wallstein. .......................................................................................... 294

Feeding habits of metamorphosed Ambystoma tigrinum melanostictum in ponds of high pH (> 9). Brian T. Miller and John H. Larsen, Jr. .......................................................................................... 299

Turkey vultures decline at a traditional roosting site. Daniel M. Taylor. .......................................................................................... 305

Barn owl diet includes mammal species new to the island fauna of the Great Salt Lake. Carl D. Marti. .......................................................................................... 307

Distributional study of the Zion Snail, Physa zionis, Zion National Park, Utah. David Ng and James R. Barnes. ........................................................................ 310

Blockage and recovery of nitrification in soils exposed to acetylene. Steven J. Burns and Richard E. Terry. .......................................................................................... 316

New thagriine leafhoppers from the Oriental Region, with a key to 30 species (Homoptera: Cicadellidae: Coelidiinae), M. W. Nielson. .......................................................................................... 321

Genus Paralidius with descriptions of new species (Homoptera: Cicadellidae: Coelidiinae), M. W. Nielson. .......................................................................................... 329

Montane insular butterfly biogeography: fauna of Ball Mountain, Siskiyou County, California. Arthur M. Shapiro. .......................................................................................... 336

Comparative habitat and community relationships of Atriplex confertifolia and Sarcobatus vermiculatus in central Utah. Jack D. Brotherson, Lars L. Rasmussen, and Richard D. Black. .......................................................................................... 348

Trees used simultaneously and sequentially by breeding cavity-nesting birds. Kevin J. Gutzwiller and Stanley H. Anderson. .......................................................................................... 358

New species of Mentzelia (Loasaceae) from Grand County, Utah. Barry A. Frigge. .......................................................................................... 361

Utah flora: Juncaceae. Sherel Goodrich. .......................................................................................... 366
