**Review**

*Bunnies!!!* is the story of an adorable little monster who just wants to play. This friendly little monster is just going for a stroll saying hello to everything he sees: trees, clouds, rocks, a stump, and BUNNIES! Because he is a monster, the bunnies might be scared of him. But all monster wants to do is make friends and play too.

This book is full of amazing illustrations that would draw any kid in. With few words and large text, it makes a great book for children who are just learning to read while still being able to draw in younger children and keep their attention. The bright colors and simple message of accepting those who are different than us will captivate and teach young readers to accept and love all the different kinds of people around us.
